EXPERIENCE

Jul 2025 - Actual
A Point of Sale *(POS)*

A Point of Sale (POS) system designed for small businesses. Built with React and Django, it is still in development but aims to provide a user-friendly interface for managing sales, inventory, and customer data.

Oct 2025 - Nov 2025
Therapy System

This is a full-stack project that implements a comprehensive management system for a daycare center or clinical care facility, focused on the administration of patients, medical appointments, tests, and reports. It demonstrates experience in building robust APIs with Python and creating dynamic user interfaces with React.js.

May 2025 - Jul 2025
Money Envelopes

A web application for managing personal finances using the envelope budgeting method. Developed with Django, it helps users organize their expenses and savings efficiently.

EDUCATION

January 2024-October 2026
Systems Engineering, University Fidélitas, 2024-2026
